About Us

We at Mahamaya Industries have been working since 2008 with a mission to uplift the industrial work & output of oil, rubber, wastewater treatment & more industries by providing them superior quality of equipment. Under the tutelage of our visionary mentor, Mr. Avijit Sengupta (CEO), we have been operating proficiently as a manufacturer in the market and fulfilling the rising demands of industries & individual in responsible manner. The extensive line which we have been dealing in includes Industrial ETP Plants, Acrylic Resin Plants, Industrial Dryers, Package Boilers, Oil Reconditioning Plants, Wastewater Treatment Plants and more.

Innovation is the buzzword which is extremely pivotal for the production of highest quality equipment for various industries and we are committed to innovating advanced engineering equipment that deliver better results while ensuring high energy efficiency, low maintenance requirements and cost effective pricing. With all this, we are successfully providing resourceful machinery to our customers that satisfies their needs & high expectations effectively.

Infrastructural Advantages

In a short span of time, we have acquired tremendous success in the domain of Chemical Equipment Heat Transfer Equipment. We owe this success to our modern infrastructure, which comprises a manufacturing unit, covering an area of 13000 square feet and having the installed capacity of 13000 units. The unit has all the required machinery, equipment and tools that are highly innovative; enabling us to ensure the production as per market latest developments.

Focus On Quality

Being a quality centric company, we have implemented various measures in our industrial activities to fulfil all our given commitment towards offering international quality equipment, systems and solutions. We have employed a team of quality inspectors, who are immensely experienced in their domain of work and assists in proper implementation of the said measures. They are managing our quality control department, where the quality of raw material and finished equipment is ensured by them.

Our Products

Industrial ETP Plant

ETP Project

Effluent Treatment Plant

Acrylic Resin Plant

Industrial Dryers

Bentonite Powder

Industrial Adhesive Making Plant

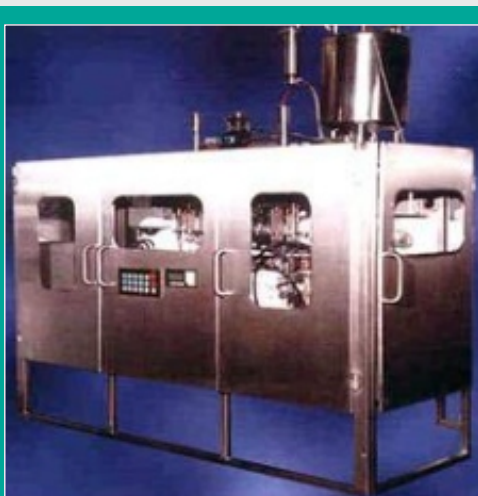

PVAC Adhesive Plant

Used Oil Reconditioning Plant

Oil Reconditioning Plant

Surgical Cotton Plants

Arsenic Removal Plants
